TEMPERATURE AND PRECIPITATION EXTREMES

HIGHEST TEMPERATURE: 93° ON THE 26TH AT FALFURRIAS AND ON THE 25TH AT LAREDO WB AIRPORT

LOWEST TEMPERATURE: 2° ON THE 10TH AT MIAMI

GREATEST TOTAL PRECIPITATION: 7.67 INCHES AT RICHARDS

LEAST TOTAL PRECIPITATION: 0.00 INCH AT 13 STATIONS

GREATEST ONE-DAY PRECIPITATION: 6.42 INCHES ON THE 22D AT RICHARDS

GREATEST REPORTED TOTAL SNOWFALL: 8.6 INCHES AT PANHANDLE

GREATEST REPORTED DEPTH OF SNOW ON GROUND: 6 INCHES ON THE 10TH AT SHAMROCK

% PEAK GUST

Resultant wind is the vector sum of wind directions and speeds divided by the number of observations.

See reference notes following Station Index.

REFERENCE NOTES

Additional information regarding the climate of Texas may be obtained by writing to the Weather Bureau State Climatologist at Weather Bureau Airport Station, Airport Administration Building, 3600 Manor Road, Austin, Texas 78723, or to any Weather Bureau Office near you.

DIMENSIONAL UNITS: Unless otherwise indicated, dimensional units used in this bulletin are: Temperature in °F, precipitation and evaporation in inches and wind movement in miles. Monthly degree day totals are the sums of the negative departures of average daily temperatures from 65° F. In "Supplemental Data" table directions entered in figures are tens of degrees.

OBSERVATION TIME: The Station Index shows observation times in local standard time. During the summer months some observers take the observations on daylight saving time. Snow on ground in the "Snowfall and Snow on Ground" table is at observation time for all except Weather Bureau and FAA stations. For these stations snow on ground values are at 6:00 a.m., C.S.T. Data in the "Extremes" table, "Daily Precipitation" table, "Daily Temperature" table, "Evaporation and Wind" table, and snowfall in the "Snowfall and Snow on Ground" table, when published, are for the 24 hours ending at time of observation.

EVAPORATION is measured in the standard Weather Bureau type pan of 4-foot diameter unless otherwise shown by footnote following the "Evaporation and Wind" table. Max and Min in "Evaporation and Wind" table refer to extremes of temperature of water in pan as recorded during 24 hours ending at time of observation.

WATER EQUIVALENT values published in the "Snowfall and Snow on Ground" table are the water equivalent of snow, sleet, or ice on the ground. Samples for obtaining measurements are taken from different points for successive observations; consequently, occasional drifting and other causes of local variability in the snowpack may result in apparent inconsistencies in the record.

SNOWFALL: Entries of snowfall in the "Climatological Data" table, the "Snowfall and Snow on Ground" table, and in the "Seasonal Snowfall" table, include snow and sleet. Entries of snow on ground include snow, sleet, and ice.

NORMALS for all stations are climatological standard normals based on the period 1931-1960.

DIVISIONS, as used in this publication, became effective with data for October 1956.

STATION NAMES: Figures and letters following the station name, such as 12 SSW, indicate distance in miles and direction from the post office.

SEASONAL TABLES: Monthly and seasonal snowfall and heating degree days for the 12 months ending with the preceding June data will be carried in the July issue of this bulletin.

DELAYED DATA AND CORRECTIONS will be carried only in the June and December issues of this bulletin.

INTERPOLATED VALUES for monthly precipitation totals may be found in the annual issue of this publication.

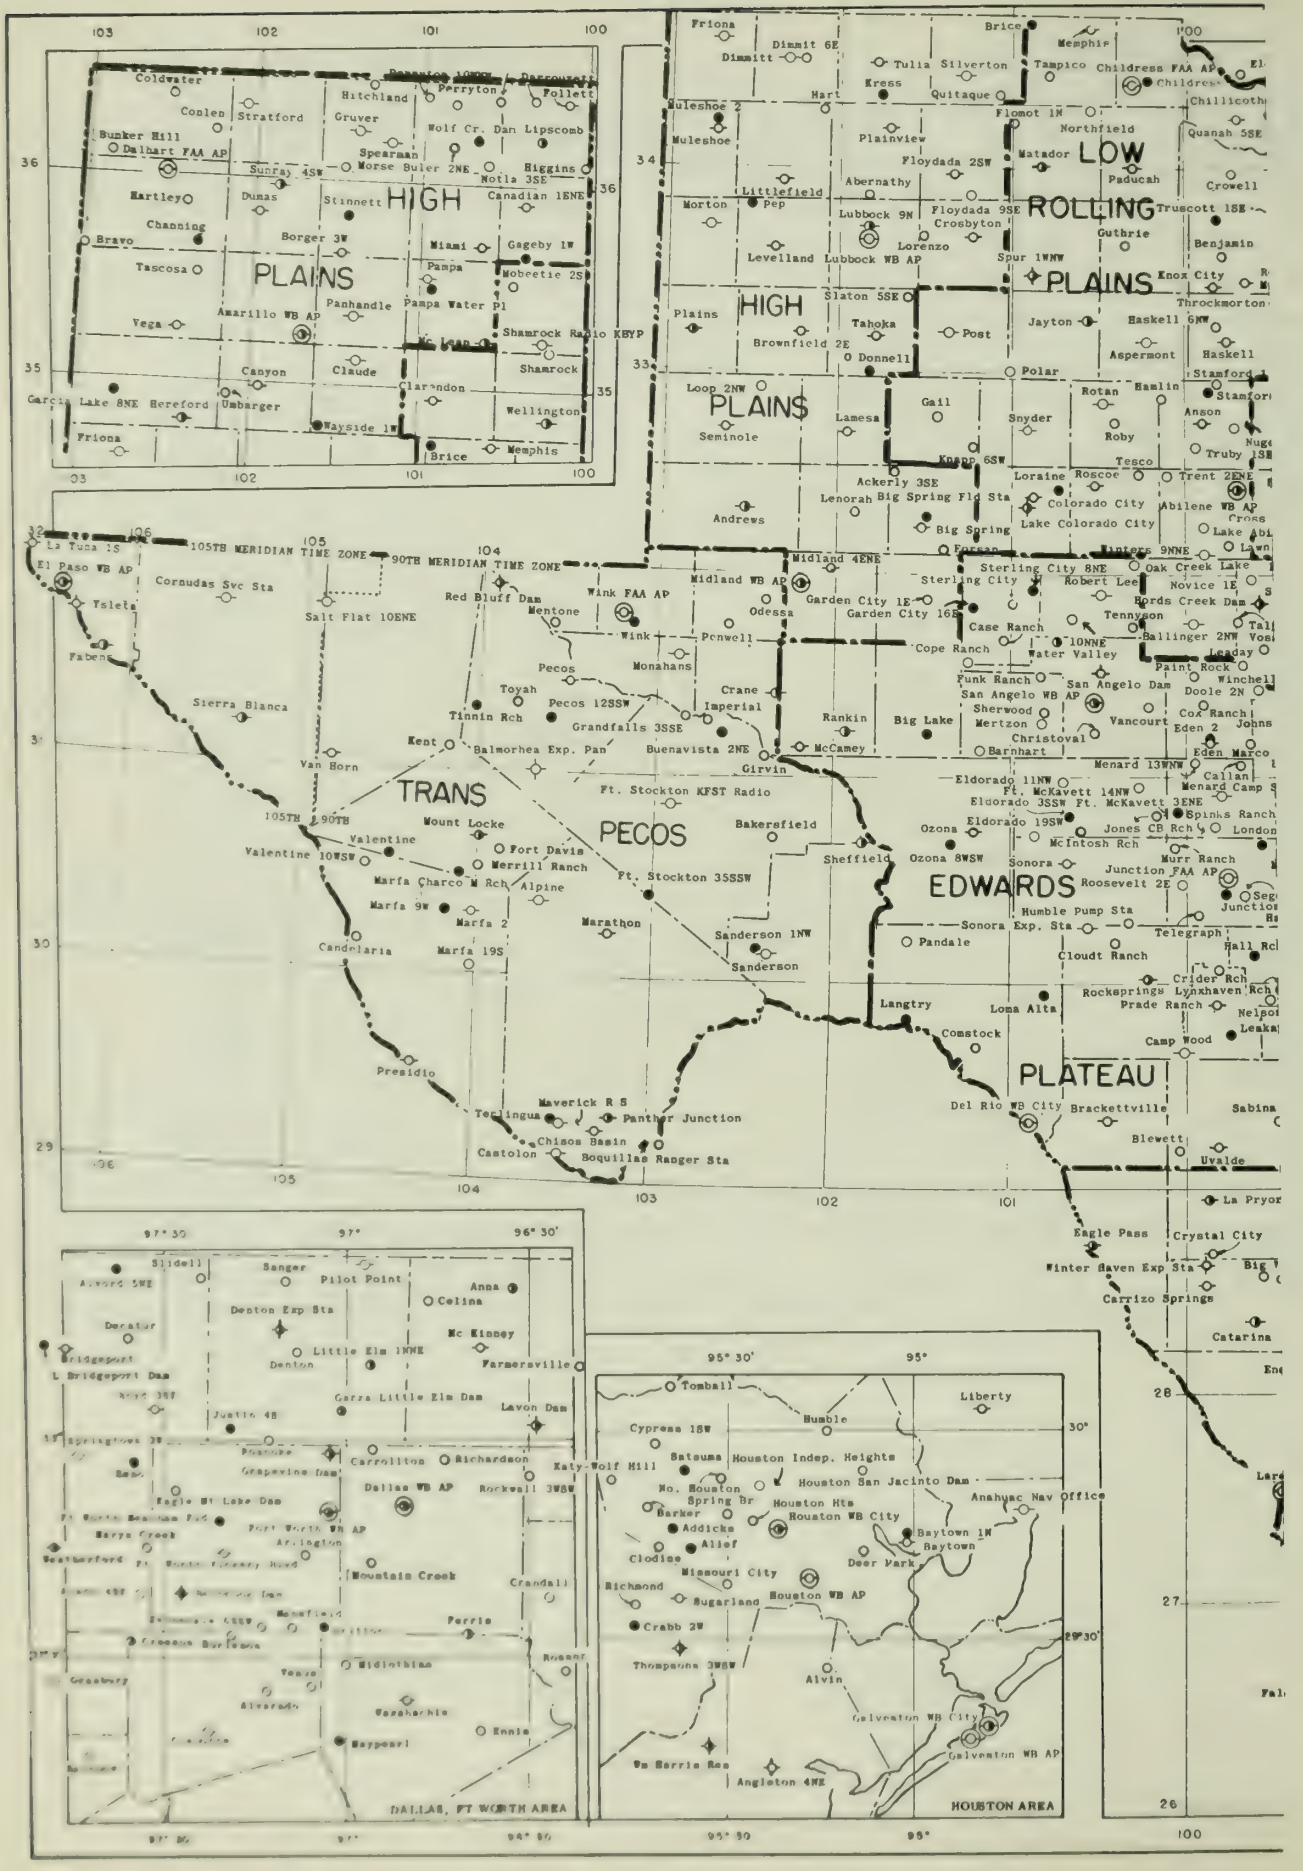
IN THE DATA TABLES THE SYMBOLS AND LETTERS WHEN USED INDICATE THE FOLLOWING:

- \- No record in the "Supplemental Data" table, "Daily Precipitation" table, "Evaporation and Wind" table, "Snowfall and Snow on Ground" table, and the Station Index.

  No record in the "Climatological Data" table and the "Daily Temperature" table is indicated by no entry.
- \+ And also on an earlier date or dates.
- ++ Highest observed one minute windspeed. This station is not equipped with an instrument to measure fastest mile data.
- * Amount included in following measurement, time distribution unknown.
- // Gage is equipped with a windshield.
- B Adjusted to a full month.
- D Water equivalent of snowfall wholly or partly estimated, using a ratio of 1 inch water equivalent to every 10 inches of new snowfall.
- M One or more days of record missing; if average value is entered, less than 10 days record is missing. See "Daily Temperature" table for detailed daily record. Degree day data, if carried for this station, have been adjusted to represent the value for a full month.
- R Amounts from recording gage. (These amounts are essentially accurate but may vary slightly from the amounts to be published later in Hourly Precipitation Data.)
- T Trace, an amount too small to measure.
- V Includes total for previous month.

IN THE STATION INDEX THE SYMBOLS AND LETTERS WHEN USED INDICATE THE FOLLOWING:

- AR This entry in time of observation column in Station Index means after rain.
- C Recording Rain Gage Station. Hourly precipitation values are processed for special purposes, and are published later in the "Hourly Precipitation Data" bulletin. If daily amounts are published in "Climatological Data" bulletin they are from a separate non-recording gage, except where indicated by reference 'R'. Such amounts may differ from amounts published from the recording gage in the "Hourly Precipitation Data" bulletin.
- G "Soil Temperature" table.
- H "Snowfall and Snow on Ground" table. Omission of data in any month indicates no snowfall and/or snow on ground in that month.
- J "Supplemental Data" table.
- SS This entry in time of observation column in Station Index means observation made near sunset.
- VAR This entry in time of observation column in Station Index means variable.
- # Thermometers are generally exposed in a shelter located a few feet above sod-covered ground; however, this reference indicates that the thermometers are exposed in a shelter located on the roof of a building.



Stations appearing in the Index, but for which data are not listed in the tables, were either missing or received too late to be included in this issue.

General weather conditions in the U. S. for each month are described in the publications MONTHLY WEATHER REVIEW, MONTHLY CLIMATOLOGICAL DATA NATIONAL SUMMARY, and STORM DATA, all of which may be obtained from the Superintendent of Documents, Government Printing Office, Washington, D. C. 20402.

Information concerning the history of changes in locations, elevations, exposure, etc., of substations through 1955 may be found in the publication "Substation History" for this State, price $1.00. Similar information for regular Weather Bureau stations may be found in the latest annual issue of Local Climatological Data, price 15 cents. These publications may be obtained from the Superintendent of Documents at the address shown above.

Subscription Price: 20 cents per copy, monthly and annual; $2.50 per year. (Yearly subscription includes the Annual Summary.) Checks and money orders should be made payable to the Superintendent of Documents. Remittance and correspondence regarding subscriptions should be sent to the Superintendent of Documents, Government Printing Office, Washington, D. C. 20402.

TEMPERATURE AND PRECIPITATION EXTREMES

HIGHEST TEMPERATURE: 90° ON THE 28+ AT 3 STATIONS

LOWEST TEMPERATURE: 0° ON THE 24TH AT BRAVO

GREATEST TOTAL PRECIPITATION: 10.34 INCHES AT MAUD

LEAST TOTAL PRECIPITATION: 0.00 INCH AT HITCHLAND

GREATEST ONE-DAY PRECIPITATION: 4.84 INCHES ON THE 9TH AT PARIS

GREATEST REPORTED TOTAL SNOWFALL: 14.0 INCHES AT MERRILL RANCH

GREATEST REPORTED DEPTH OF SNOW ON GROUND: 6 INCHES ON THE 18TH AT MERRILL RH

REFERENCE NOTES

Additional information regarding the climate of Texas may be obtained by writing to the Weather Bureau State Climatologist at Weather Bureau Airport Station, Airport Administration Building, 3600 Manor Road, Austin, Texas 78723, or the Weather Bureau Office near you.

UNITS AND TERMS - Data in this publication are expressed in the U.S. customary units. The basic units used in this bulletin are Temperature in °F, precipitation and evaporation in inches and wind movement in miles. Monthly degree day totals are computed on the basis of 65° F. Degree days are accumulations of the departures of the average daily temperatures from 65° F. In "Supplemental Data" table directions entered in figures are tens of degrees. Resultant wind is the vector sum of wind directions and wind movements for the hours shown.

TIME OF OBSERVATION - The hourly precipitation data shown in this publication are for the hour ending at the observation time. Observation times are in local standard time. During the summer months some observers take the observations on daylight saving time. Snow on ground in the "Snowfall and Snow on Ground" table is for the observation time for all except Weather Bureau and FAA stations. For these stations snow on ground values are at 6:00 a.m., C.S.T. Data in the "Extremes" table, "Daily Precipitation" table, "Evaporation and Wind" table, and snowfall in the "Snowfall and Snow on Ground" table, when published, are for the 24 hours ending at time of observation.

EXPOSURE OF INSTRUMENTS - Instruments are exposed in the standard Weather Bureau type pan of 4-foot diameter unless otherwise shown by footnote following the "Evaporation and Wind" table. Max and Min in "Evaporation and Wind" table are the highest and lowest temperatures observed as recorded during 24 hours ending at time of observation.

WATER EQUIVALENT - Water measurements in the "Snowfall and Snow on Ground" table are the water equivalent of snow, sleet, or ice on the ground. Samples for obtaining measurements are taken from different points and locations in each area sampled. Drifting, settlement, and other causes of local variability in the snowpack may result in apparent inconsistencies in the record.

SNOWFALL - Entries of snowfall in the "Climatological Data" table, the "Snowfall and Snow on Ground" table, and in the "Seasonal Snowfall" table, include snow and sleet. Entries of snow on ground include snow, sleet and ice.

NORMALS - All normals are climatological standard normals based on the period 1931-1960.

STATIONS - All stations in this publication, became effective with data for October 1956.

STATION NAMES - Figures and letters following the station name, such as 12 SSW, indicate distance in miles and direction from the post office.

SEASONAL NORMALS - Monthly and seasonal snowfall and heating degree days for the 12 months ending with the preceding June data will be carried in the July issue of this bulletin.

DELAYED DATA AND CORRECTIONS will be carried only in the June and December issues of this bulletin.

INTERMEDIATE TOTALS for months precipitation totals may be found in the annual issue of this publication.

IN THE DATA TABLES THE SYMBOLS AND LETTERS WHEN USED INDICATE THE FOLLOWING

- No entry in the Supplemental Data table, Daily Precipitation table, "Evaporation and Wind" table, "Snowfall and Snow on Ground" table, and the Station Index.

  No entry in the Climatological Data table and the Daily Temperature table is indicated by no entry.

- Amount is an earlier date or dates.

-- Highest wind speed is fastest mile windspeed. This station is not equipped with an instrument to measure fastest mile data.

• Amount included in following measurement, time distribution unknown.

[illegible] Precipitation associated with a thunderstorm.

[illegible] Precipitation of trace amount.

[illegible] Water equivalent of snowfall, ice or pellets estimated, using a ratio of 1 inch water equivalent to every 10 inches of new snowfall.

[illegible] Some data missing. If average value is entered, less than 10 days record is missing. See "Daily Temperature" table for detailed daily record. Degree day data, if carried for this station, are estimated using the value for a full month.

[illegible] Precipitation recorded in a gage. These amounts are essentially accurate but may vary slightly from the amounts to be published later in Hourly Precipitation Data.)

[illegible] Trace of precipitation, but not measurable.

[illegible] Trace of snow on ground.

IN THE STATION INDEX THE SYMBOLS AND LETTERS WHEN USED INDICATE THE FOLLOWING

[illegible] Precipitation data for Station Index means after rain.

[illegible] Precipitation amounts are processed for special purposes, and are published later in the "Hourly Precipitation Data" bulletin. If daily amounts are published in this bulletin, they are obtained from the recording gage, except where indicated by reference 'R'. Such amounts may differ from amounts published from the recording gage in the Hourly Precipitation Data.

[illegible] Trace of precipitation.

[illegible] Trace of snow on ground. (Occurrence of this data in any month indicates no snowfall and or snow on ground in that month.

[illegible] Temperature and wind data.

[illegible] Temperature data in Station Index means observation made near sunset.

[illegible] Temperature data in Station Index means variable.

[illegible] Thermometers are exposed at 5 feet above sod-covered ground however, this reference indicates that the thermometers are exposed in a shelter located on the roof of a building.

[illegible] Data for the current month in the tables are either missing or received too late to be included in this issue.

[illegible] publications MONTHLY WEATHER REVIEW, MONTHLY CLIMATOLOGICAL DATA NATIONAL SUMMARY, and STORM DATA, all of [illegible] Government Printing Office, Washington, D. C. 20402.

[illegible] of substations through 1955 may be found in the publication "Substation History" for this State, price $1.00. Similar [illegible] Publications [illegible] the latest annual issue of Local Climatological Data, price 15 cents. These publications may be obtained from the Superintendent of Documents at [illegible]

[illegible] per year. (Yearly subscription includes the Annual Summary.) Checks and money orders should be made payable to the Superintendent [illegible] should be sent to the Superintendent of Documents, Government Printing Office, Washington, D. C. 20402.

TEXAS

MARCH 1965
Volume 70 No. 3

THE LIBRARY OF THE
JUN 1 1965
UNIVERSITY OF ILLINOIS

ASHEVILLE: 1965

SPECIAL WEATHER SUMMARY

The cold, cloudy, humid weather experienced in February continued throughout the month of March. Extremely cold arctic air spread southward across Texas on the 4th and again on the 20th. Continental polar air of less severity invaded the State frequently to hold temperatures down. On the 20th most Weather Bureau offices reported the lowest temperature ever recorded so late in the season. Abilene reported a minimum of 15° F. on the 20th, the lowest temperature of the entire winter season.

Average monthly temperatures were 4° to 8° below normal. For Dallas, Fort Worth, and Waco, this was the coldest March since 1915. At Austin the average temperature for the month was the lowest since 1924. Many Weather Bureau offices reported the lowest average monthly temperature since 1958.

Precipitation was evenly distributed throughout the month, but generally less than normal except in portions of Central Texas. Most of the Southern High Plains, Low Rolling Plains, Southern Texas, and the Coastal region received less than one-half normal precipitation. Precipitation in the Trans-Pecos and Lower Rio Grande Valley was about one-fourth normal.

REFERENCE NOTES

Additional information regarding the climate of Texas may be obtained by writing to the Weather Bureau State Climatologist at Weather Bureau Airport Station, Airport Administration Building, 3600 Manor Road, Austin, Texas 78723, or to any Weather Bureau Office near you.

DIMENSIONAL UNITS: Unless otherwise indicated, dimensional units used in this bulletin are: Temperature in °F, precipitation and evaporation in inches and wind movement in miles. Monthly degree day totals are the sums of the negative departures of average daily temperatures from 65° F. In "Supplemental Data" table directions entered in figures are tens of degrees. Resultant wind is the vector sum of wind directions and speeds divided by the number of observations.

OBSERVATION TIME. The Station Index shows observation times in local standard time. During the summer months some observers take the observations on daylight saving time. Snow on ground in the "Snowfall and Snow on Ground" table is at observation time for all except Weather Bureau and FAA stations. For these stations snow on ground values are at 6 00 a.m., C.S.T. Data in the "Extremes" table, "Daily Precipitation table, "Daily Temperature" table, "Evaporation and Wind" table, and snowfall in the "Snowfall and Snow on Ground" table, when published, are for the 24 hours ending at time of observation.

EVAPORATION is measured in the standard Weather Bureau type pan of 4-foot diameter unless otherwise shown by footnote following the "Evaporation and Wind" table. Max and Min in "Evaporation and Wind" table refer to extremes of temperature of water in pan as recorded during 24 hours ending at time of observation.

WATER EQUIVALENT values published in the "Snowfall and Snow on Ground" table are the water equivalent of snow, sleet, or ice on the ground. Samples for obtaining measurements are taken from different points for successive observations, consequently, occasional drifting and other causes of local variability in the snowpack may result in apparent inconsistencies in the record.

SNOWFALL: Entries of snowfall in the "Climatological Data" table, the "Snowfall and Snow on Ground" table, and in the "Seasonal Snowfall" table, include snow and sleet. Entries of snow on ground include snow, sleet, and ice.

NORMALS for all stations are climatological standard normals based on the period 1931-1960.

DIVISIONS, as used in this publication, became effective with data for October 1956.

STATION NAMES: Figures and letters following the station name, such as 12 SSW, indicate distance in miles and direction from the post office.

SEASONAL TABLES: Monthly and seasonal snowfall and heating degree days for the 12 months ending with the preceding June data will be carried in the July issue of this bulletin.

DELAYED DATA AND CORRECTIONS will be carried only in the June and December issues of this bulletin.

INTERPOLATED VALUES for monthly precipitation totals may be found in the annual issue of this publication.

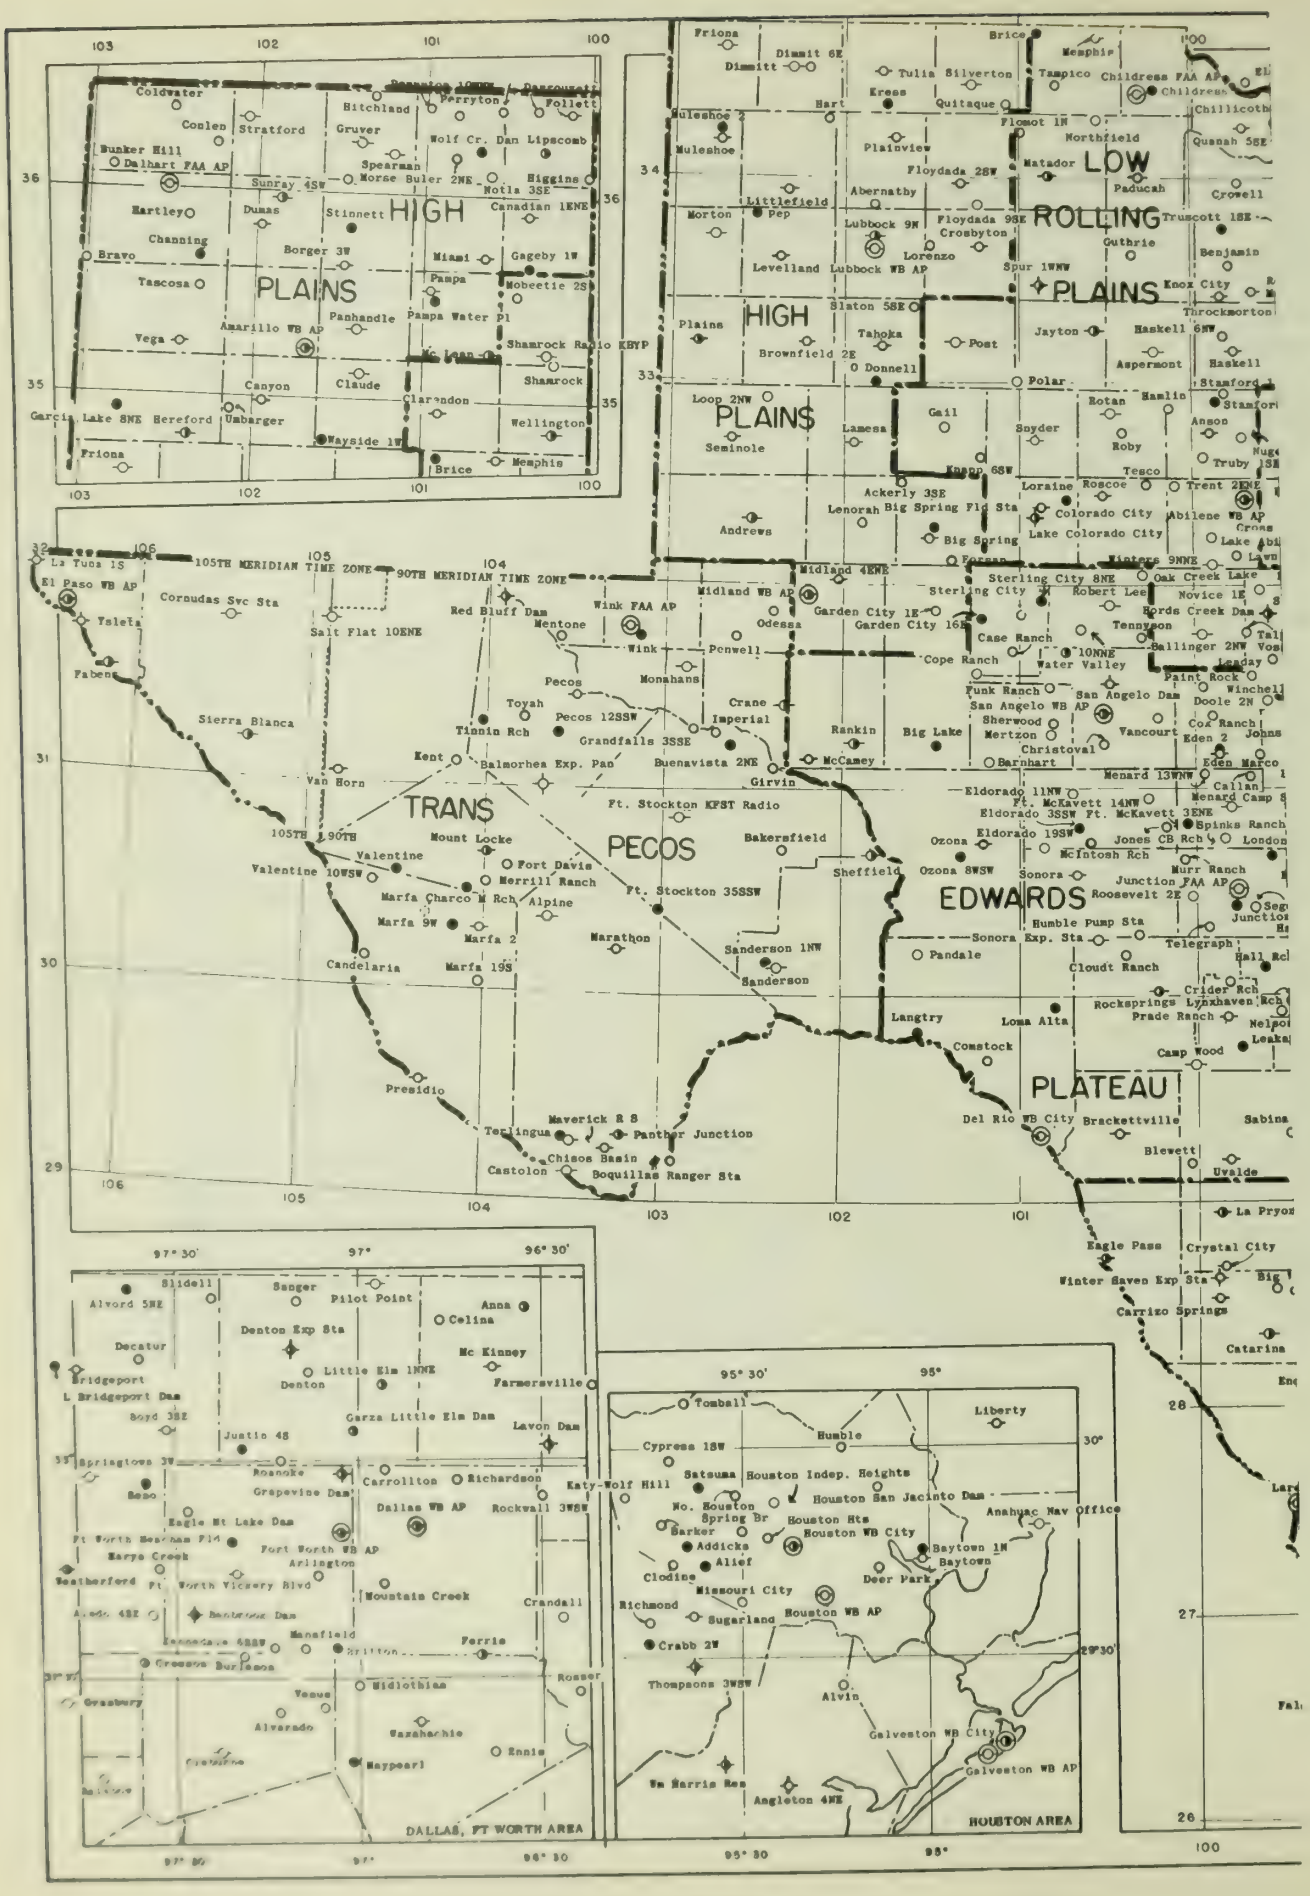
IN THE DATA TABLES THE SYMBOLS AND LETTERS WHEN USED INDICATE THE FOLLOWING:

- \- No record in the "Supplemental Data" table, "Daily Precipitation" table, "Evaporation and Wind" table, "Snowfall and Snow on Ground" table, and the Station Index.

  No record in the "Climatological Data" table and the "Daily Temperature" table is indicated by no entry.
- \+ And also on an earlier date or dates.
- ++ Highest observed one minute windspeed. This station is not equipped with an instrument to measure fastest mile data.
- * Amount included in following measurement, time distribution unknown.
- // Gage is equipped with a windshield.
- B Adjusted to a full month.
- D Water equivalent of snowfall wholly or partly estimated, using a ratio of 1 inch water equivalent to every 10 inches of new snowfall.
- M One or more days of record missing; if average value is entered, less than 10 days record is missing. See "Daily Temperature" table for detailed daily record. Degree day data, if carried for this station, have been adjusted to represent the value for a full month.
- R Amounts from recording gage. (These amounts are essentially accurate but may vary slightly from the amounts to be published later in Hourly Precipitation Data.)
- T Trace, an amount too small to measure.
- V Includes total for previous month.

IN THE STATION INDEX THE SYMBOLS AND LETTERS WHEN USED INDICATE THE FOLLOWING:

- AR This entry in time of observation column in Station Index means after rain.
- C Recording Rain Gage Station. Hourly precipitation values are processed for special purposes, and are published later in the "Hourly Precipitation Data" bulletin. If daily amounts are published in "Climatological Data" bulletin they are from a separate non-recording gage, except where indicated by reference 'R'. Such amounts may differ from amounts published from the recording gage in the "Hourly Precipitation Data" bulletin.
- G "Soil Temperature" table.
- H "Snowfall and Snow on Ground" table. Omission of data in any month indicates no snowfall and/or snow on ground in that month.
- J "Supplemental Data" table.
- SS This entry in time of observation column in Station Index means observation made near sunset.
- VAR This entry in time of observation column in Station Index means variable.
- # Thermometers are generally exposed in a shelter located a few feet above sod-covered ground; however, this reference indicates that the thermometers are exposed in a shelter located on the roof of a building.



Stations appearing in the Index, but for which data are not listed in the tables, were either missing or received too late to be included in this issue.

General weather conditions in the U. S. for each month are described in the publications MONTHLY WEATHER REVIEW, MONTHLY CLIMATOLOGICAL DATA NATIONAL SUMMARY, and STORM DATA, all of which may be obtained from the Superintendent of Documents, Government Printing Office, Washington, D. C. 20402.

Information concerning the history of changes in locations, elevations, exposure, etc., of substations through 1955 may be found in the publication "Substation History" for this State, price $1.00. Similar information for regular Weather Bureau stations may be found in the latest annual issue of Local Climatological Data, price 15 cents. These publications may be obtained from the Superintendent of Documents at the address shown above.

Subscription Price: 20 cents per copy, monthly and annual; $2.50 per year. (Yearly subscription includes the Annual Summary.) Checks and money orders should be made payable to the Superintendent of Documents. Remittance and correspondence regarding subscriptions should be sent to the Superintendent of Documents, Government Printing Office, Washington, D. C. 20402.

REFERENCE NOTES

Additional information regarding the climate of Texas may be obtained by writing to the Weather Bureau State Climatologist at Weather Bureau Airport Station, Airport Administration Building, 3600 Manor Road, Austin, Texas 78703, or to any Weather Bureau Office near you.

DIMENSIONAL UNITS Unless otherwise indicated, dimensional units used in this bulletin are: Temperature in °F, precipitation and evaporation in inches and wind movement in miles. Monthly degree day totals are the sums of the negative departures of average daily temperatures from 65° F. In "Supplemental Data" table directions entered in figures are tens of degrees. Resultant wind is the vector sum of wind directions and speeds for the number of observations.

OBSERVATION TIME The Station Index shows observation times in local standard time. During the summer months some observers take the observations on daylight saving time. Snow on ground in the "Snowfall and Snow on Ground" table is at observation time for all except Weather Bureau and FAA stations. For these stations snow on ground values are at 6:00 a.m., C.S.T. Data in the "Extremes" table, "Daily Precipitation" table, Daily Temperature table, "Evaporation and Wind" table, and snowfall in the "Snowfall and Snow on Ground" table, when published, are for the 24 hours ending at time of observation.

EVAPORATION is measured in the standard Weather Bureau type pan of 4-foot diameter unless otherwise shown by footnote following the "Evaporation and Wind" table. Max and Min in "Evaporation and Wind" table refer to extremes of temperature of water in pan as recorded during 24 hours ending at time of observation.

WATER EQUIVALENT values published in the "Snowfall and Snow on Ground" table are the water equivalent of snow, sleet, or ice on the ground. Samples for obtaining measurements are taken from different points for successive observations consequently, occasional drifting and other causes of local variability in the snowpack may result in apparent inconsistencies in the record.

SNOWFALL Entries of snowfall in the "Climatological Data" table, the "Snowfall and Snow on Ground" table, and in the "Seasonal Snowfall" table, include snow and sleet. Entries of snow on ground include snow, sleet and ice.

NORMALS for all stations are climatological standard normals based on the period 1931-1960.

DIVISIONS, as used in this publication, became effective with data for October 1956.

STATION NAMES Figures and letters following the station name, such as 12 SSW, indicate distance in miles and direction from the post office.

SEASONAL TABLES Monthly and seasonal snowfall and heating degree days for the 12 months ending with the preceding June data will be carried in the July issue of this bulletin.

DELAYED DATA AND CORRECTIONS will be carried only in the June and December issues of this bulletin.

INTERPOLATED VALUES for monthly precipitation totals may be found in the annual issue of this publication.

IN THE DATA TABLES THE SYMBOLS AND LETTERS WHEN USED INDICATE THE FOLLOWING:

- No record in the "Supplemental Data" table, "Daily Precipitation" table, "Evaporation and Wind" table, "Snowfall and Snow on Ground" table, and the Station Index.

  No record in the "Climatological Data" table and the "Daily Temperature" table is indicated by no entry.

- And also on an earlier date or dates.

-- Highest observed one minute windspeed. This station is not equipped with an instrument to measure fastest mile data.

• Amount included in following measurement, time distribution unknown.

  Gage is equipped with a windshield.

B Adjusted for a full month.

E Water equivalent of snowfall wholly or partly estimated, using a ratio of 1 inch water equivalent to every 10 inches of new snowfall.

M Data or more days of record missing if average value is entered, less than 10 days record is missing. See "Daily Temperature" table for detailed daily record. Degree day data, if carried for this station, have been adjusted to represent the value for a full month.

R Amount from a recording gage. (These amounts are essentially accurate but may vary slightly from the amounts to be published later in Hourly Precipitation Data.)

T Trace, an amount too small to measure.

[illegible] Accumulation for previous month.

IN THE STATION INDEX THE SYMBOLS AND LETTERS WHEN USED INDICATE THE FOLLOWING:

AR The [illegible] observation column in Station Index means after rain.

[illegible] Hourly precipitation values are processed for special purposes, and are published later in the "Hourly Precipitation Data" bulletin. If daily amounts are published in [illegible] data [illegible] therefrom a separate non-recording gage, except where indicated by reference 'R'. Such amounts may differ from amounts published from the recording gage in [illegible] bulletin.

[illegible] temperature table.

[illegible] table. Omission of data in any month indicates no snowfall and/or snow on ground in that month.

[illegible] data table.

[illegible] observation column in Station Index means observation made near sunset.

[illegible] Station Index means variable.

[illegible] thermometers exposed in a shelter located a few feet above sod-covered ground, however, this reference indicates that the thermometers are exposed in a shelter located on the roof of a [illegible].

[illegible] data are not listed in the tables, were either missing or received too late to be included in this issue.

[illegible] for each month are described in the publications MONTHLY WEATHER REVIEW, MONTHLY CLIMATOLOGICAL DATA NATIONAL SUMMARY, and STORM DATA, all of [illegible] Government Printing Office, Washington, D. C. 20402.

[illegible] locations, elevations, exposure, etc., of substations through 1955 may be found in the publication "Substation History" for this State, price $1.00. Similar [illegible] may be found in the latest annual issue of Local Climatological Data, price 15 cents. These publications may be obtained from the Superintendent of Documents at [illegible].

[illegible] 17.75 per year. (Yearly subscription includes the Annual Summary.) Checks and money orders should be made payable to the Superintendent [illegible] regarding subscriptions should be sent to the Superintendent of Documents, Government Printing Office, Washington, D. C. 20402.

Volume 70 No. 5

ASHEVILLE: 1965

SPECIAL WEATHER SUMMARY

Little or no rain fell during the first week of May. Severely dry weather gripped South Texas and the Upper Coast. Dryland farmers on the Southern High Plains needed planting moisture for cotton and sorghum. This weather pattern was dramatically reversed the last three weeks of the month. Thundershowers were frequent and heavy. Torrential downpours were numerous in the eastern half of Texas around mid-month. The heaviest falls occurred in North Central, South Central, and the western portion of East Texas. By the end of the month, precipitation in these areas totaled 250 to 300 percent of normal. Waco received 15.00 inches, the greatest May total since records began in 1867, while Austin received 9.98 inches, the greatest May total in 36 years.

Streamflow was excessive in a broad band through the central and eastern part of the State. In the middle Brazos River Basin, heavy rains up to 10 inches on the 14th-16th produced flooding on major tributary streams. Cowhouse Creek at Pidcoke, in Coryell County, reached its second highest stage since at least 1882, and Nolan Creek caused considerable flood damage in Killeen and Belton. The Trinity River was at flood stage throughout most of its length during the month. Flooding occurred on the lower Brazos River below Richmond. Flooding also occurred in the San Antonio area on the 16th-18th, when up to 8 inches of rain was recorded, and on the Frio and Atascosa drainage area after rains totaling up to 11 inches fell on the 17th and 18th. The Highland Lakes, on the Colorado River near Austin, gained over 400,000 acre-feet. While the heavy May rains brought farming activity to a standstill over the eastern two-thirds of the State, the more moderate rains on the High Plains were a welcome boost to cotton, sorghum, and wheat.

Despite the generous rains in the more central sections of Texas, the State's extremities closed out the month with rainfall deficiencies. Rainfall was only 50 to 75 percent of normal on the High Plains and in the Lower Rio Grande Valley, and 25 to 50 percent of normal in the western portion of the Trans-Pecos. Rainfall was also less than normal along the Upper Coast.

Tornadoes, windstorms, and hailstorms were numerous during the month. Most of these caused relatively minor damage to property and crops; however, a devastating hailstorm struck the Wichita Falls area on the 27th. Losses within the city were estimated at between $5 and $6 million. Crops in the path of the storm were reported to be a total loss.

Throughout most of Texas, average temperatures were slightly above normal for May.

For detailed information, the reader is referred to STORM DATA and WEEKLY WEATHER AND CROP BULLETINS for May.

REFERENCE NOTES

Additional information regarding the climate of Texas may be obtained by writing to the Weather Bureau State Climatologist at Weather Bureau Airport Station, Airport Administration Building, 3600 Manor Road, Austin, Texas 78722, or to any Weather Bureau Office near you.

DIMENSIONAL UNITS. Unless otherwise indicated, dimensional units used in this bulletin are: Temperature in °F, precipitation and evaporation in inches and wind movement in miles. Monthly degree day totals are the sums of the negative departures of average daily temperatures from 65° F. In "Supplemental Data" table directions entered in figures are tens of degrees. Resultant wind is the vector sum of wind directions and speeds divided by the number of observations.

OBSERVATION TIME. The Station Index shows observation times in local standard time. During the summer months some observers take the observations on daylight saving time. Snow on ground in the "Snowfall and Snow on Ground" table is at observation time for all except Weather Bureau and FAA stations. For these stations snow on ground values are at 6:00 a.m., C.S.T. Data in the "Extremes" table, "Daily Precipitation" table, "Daily Temperature" table, Evaporation and Wind" table, and snowfall in the "Snowfall and Snow on Ground" table, when published, are for the 24 hours ending at time of observation.

EVAPORATION is measured in the standard Weather Bureau type pan of 4-foot diameter unless otherwise shown by footnote following the "Evaporation and Wind" table. Max and Min in "Evaporation and Wind" table refer to extremes of temperature of water in pan as recorded during 24 hours ending at time of observation.

WATER EQUIVALENT values published in the "Snowfall and Snow on Ground" table are the water equivalent of snow, sleet, or ice on the ground. Samples for obtaining measurements are taken from different points at successive observations. Consequently, occasional drifting and other causes of local variability in the snowpack may result in apparent inconsistencies in the record.

SNOWFALL. Entries of snowfall in the "Climatological Data" table, the "Snowfall and Snow on Ground" table, and in the "Seasonal Snowfall" table, include snow and sleet. Entries of snow on ground include snow, sleet, and ice.

NORMALS for all stations are climatological standard normals based on the period 1931-1960.

TIMESONS as used in this publication, became effective with data for October 1956.

STATION NAMES. Figures and letters following the station name, such as 12 SSW, indicate distance in miles and direction from the post office.

SEASONAL TABLES. Monthly and seasonal snowfall and heating degree days for the 12 months ending with the preceding June data will be carried in the July issue of this bulletin.

DELAYED DATA AND CORRECTIONS will be carried only in the June and December issues of this bulletin.

INTERPOLATED VALUES for monthly precipitation totals may be found in the annual issue of this publication.

IN THE DATA TABLES THE SYMBOLS AND LETTERS WHEN USED INDICATE THE FOLLOWING

- No report in the "Supplemental Data" table, "Daily Precipitation" table, "Evaporation and Wind" table, "Snowfall and Snow on Ground" table, and the Station Index.

  No report in the "Climatological Data" table and the "Daily Temperature" table is indicated by no entry.

- Also also on an earlier date or dates.

-- Highest observed one minute windspeed. This station is not equipped with an instrument to measure fastest mile data.

* An estimate included in following measurement, time distribution unknown.

  Gage is equipped with a windshield.

  Accumulated in a full month.

  Water equivalent of snowfall, wholly or partly estimated, using a ratio of 1 inch water equivalent to every 10 inches of new snowfall.

  Number of days of record missing. If average value is entered, less than 10 days record is missing. See "Daily Temperature" table for detailed daily record. Degree day data, if carried for this station, are interpolated to represent the value for a full month.

  Amount from recording gage. (These amounts are essentially accurate but may vary slightly from the amounts to be published later in Hourly Precipitation Data.)

  Trace, an amount too small to measure.

  Accumulation for previous month.

IN THE DATA TABLES THE NUMBERS AND LETTERS WHEN USED INDICATE THE FOLLOWING

  This entry in time of observation column in Station Index means after rain.

  Recording Rain Gage Station. Hourly precipitation values are processed for special purposes, and are published later in the "Hourly Precipitation Data" bulletin. If daily amounts are published in this bulletin they are from a separate non-recording gage, except where indicated by reference 'R'. Such amounts may differ from amounts published from the recording gage in this bulletin.

  Daily temperature table.

  Snowfall and snow on ground table. Omission of data in any month indicates no snowfall and/or snow on ground in that month.

  Daily precipitation table.

  This entry in time of observation column in Station Index means observation made near sunset.

  This entry in time of observation column in Station Index means variable.

  Thermometers are exposed in a shelter located a few feet above sod-covered ground, however, this reference indicates that the thermometers are exposed in a shelter located on the roof of a building.

  Data are not listed in the tables, were either missing or received too late to be included in this issue.

Publications containing the latest normals and means are listed in the publications MONTHLY WEATHER REVIEW, MONTHLY CLIMATOLOGICAL DATA NATIONAL SUMMARY, and STORM DATA, all of which may be purchased from the Superintendent of Documents, Government Printing Office, Washington, D. C. 20402.

Publications containing the history of changes in locations, exposures, etc., of substations through 1955 may be found in the publication "Substation History" for this State, price $1.00. Similar publications for previous periods may be found in the later annual issue of Local Climatological Data, price 15 cents. These publications may be obtained from the Superintendent of Documents at the address above.

Subscription price of this publication is $1.5 per year. (Yearly subscription includes the Annual Summary.) Checks and money orders should be made payable to the Superintendent of Documents. Correspondence regarding subscriptions should be sent to the Superintendent of Documents, Government Printing Office, Washington, D. C. 20402.

REFERENCE NOTES

Additional information regarding the climate of Texas may be obtained by writing to the Weather Bureau State Climatologist at Weather Bureau Airport Station, Airport Administration Building, 3600 Manor Road, Austin, Texas 78723, or to any Weather Bureau Office near you.

DIMENSIONAL UNITS: Unless otherwise indicated, dimensional units used in this bulletin are: Temperature in °F, precipitation and evaporation in inches and wind movement in miles. Monthly degree day totals are the sums of the negative departures of average daily temperatures from 65° F. In "Supplemental Data" table directions entered in figures are tens of degrees. Resultant wind is the vector sum of wind directions and speeds divided by the number of observations.

OBSERVATION TIME: The Station Index shows observation times in local standard time. During the summer months some observers take the observations on daylight saving time. Snow on ground in the "Snowfall and Snow on Ground" table is at observation time for all except Weather Bureau and FAA stations. For these stations snow on ground values are at 6:00 a.m., C.S.T. Data in the "Extremes" table, "Daily Precipitation" table, "Daily Temperature" table, "Evaporation and Wind" table, and snowfall in the "Snowfall and Snow on Ground" table, when published, are for the 24 hours ending at time of observation.

EVAPORATION is measured in the standard Weather Bureau type pan of 4-foot diameter unless otherwise shown by footnote following the "Evaporation and Wind" table. Max and Min in "Evaporation and Wind" table refer to extremes of temperature of water in pan as recorded during 24 hours ending at time of observation.

WATER EQUIVALENT values published in the "Snowfall and Snow on Ground" table are the water equivalent of snow, sleet, or ice on the ground. Samples for obtaining measurements are taken from different points for successive observations; consequently, occasional drifting and other causes of local variability in the snowpack may result in apparent inconsistencies in the record.

SNOWFALL. Entries of snowfall in the "Climatological Data" table, the "Snowfall and Snow on Ground" table, and in the "Seasonal Snowfall" table, include snow and sleet. Entries of snow on ground include snow, sleet, and ice.

NORMALS for all stations are climatological standard normals based on the period 1931-1960.

DIVISIONS, as used in this publication, became effective with data for October 1956.

STATION NAMES: Figures and letters following the station name, such as 12 SSW, indicate distance in miles and direction from the post office.

SEASONAL TABLES: Monthly and seasonal snowfall and heating degree days for the 12 months ending with the preceding June data will be carried in the July issue of this bulletin.

DELAYED DATA AND CORRECTIONS will be carried only in the June and December issues of this bulletin.

INTERPOLATED VALUES for monthly precipitation totals may be found in the annual issue of this publication.

IN THE DATA TABLES THE SYMBOLS AND LETTERS WHEN USED INDICATE THE FOLLOWING:

- No record in the "Supplemental Data" table, "Daily Precipitation" table, "Evaporation and Wind" table, "Snowfall and Snow on Ground" table, and the Station Index.

  No record in the "Climatological Data" table and the "Daily Temperature" table is indicated by no entry.

- And also on an earlier date or dates.

— Highest observed one minute windspeed. This station is not equipped with an instrument to measure fastest mile data.

* Amount included in following measurement, time distribution unknown.

  Gage is equipped with a windshield.

B Adjusted to a full month.

E Water equivalent of snowfall wholly or partly estimated, using a ratio of 1 inch water equivalent to every 10 inches of new snowfall.

M One or more days of record missing. If average value is entered, less than 10 days record is missing. See "Daily Temperature" table for detailed daily record. Degree day data, if carried for this station, have been adjusted to represent the value for a full month.

R Amount from recording gage. (These amounts are essentially accurate but may vary slightly from the amounts to be published later in Hourly Precipitation Data.)

T Trace, an amount too small to measure.

\+ Includes total for previous month.

IN THE STATION INDEX THE SYMBOLS AND LETTERS WHEN USED INDICATE THE FOLLOWING:

AR Time entry in time of observation column in Station Index means after rain.

C Precipitation Gage Station. Hourly precipitation values are processed for special purposes, and are published later in the "Hourly Precipitation Data" bulletin. If daily amounts are published in "Climatological Data" bulletin they are from a separate non-recording gage, except where indicated by reference 'R'. Such amounts may differ from amounts published from the recording gage in the "Hourly Precipitation Data" bulletin.

D Temperature table.

E Snowfall and Snow on Ground table. Omission of data in any month indicates no snowfall and/or snow on ground in that month.

H Evaporation, Wind Table.

K Time entry in time of observation column in Station Index means observation made near sunset.

V Time entry in time of observation column in Station Index means variable.

* Thermometers are generally exposed in a shelter located 4 to 6 feet above sod-covered ground, however, this reference indicates that the thermometers are exposed in a shelter located on the roof of a building.

Stations listed in the Index but for which data are not listed in the tables, were either missing or received too late to be included in this issue.

Publications containing data for the U.S. for each month are described in the publications MONTHLY WEATHER REVIEW, MONTHLY CLIMATOLOGICAL DATA NATIONAL SUMMARY, and STORM DATA, all of which may be purchased from the Superintendent of Documents, Government Printing Office, Washington, D. C. 20402.

Publications containing the number of changes or readjustments, elevations, exposures, etc., of substations through 1955 may be found in the publication "Substation History" for this State, price $1.00. Similar publications for other States, if any, may be found in the latest annual issue of Local Climatological Data, price 15 cents. These publications may be obtained from the Superintendent of Documents at the address above.

Publications are sold at 2 cents per copy, monthly, not issued. $.75 per year. (Yearly subscription includes the Annual Summary.) Checks and money orders should be made payable to the Superintendent of Documents. Subscriptions and correspondence regarding subscriptions should be sent to the Superintendent of Documents, Government Printing Office, Washington, D. C. 20402.

REFERENCE NOTES

Additional information regarding the climate of Texas may be obtained by writing to the Weather Bureau State Climatologist at Weather Bureau Airport Station, Airport Administration Building, 3600 Manor Road, Austin, Texas 78723, or to any Weather Bureau Office near you.

DIMENSIONAL UNITS Unless otherwise indicated, dimensional units used in this bulletin are: Temperature in °F, precipitation and evaporation in inches and wind movement in miles. Monthly degree day totals are the sums of the negative departures of average daily temperatures from 65° F. In "Supplemental Data" table directions entered in figures are tens of degrees. Resultant wind is the vector sum of wind directions and speeds as recorded by the number of observations.

OBSERVATION TIME The Station Index shows observation times in local standard time. During the summer months some observers take the observations on daylight saving time. Snow on ground in the "Snowfall and Snow on Ground" table is at observation time for all except Weather Bureau and FAA stations. For these stations snow on ground values are at 6:00 a.m., C.S.T. Data in the "Extremes" table, "Daily Precipitation" table, Daily Temperature table, "Evaporation and Wind" table, and snowfall in the "Snowfall and Snow on Ground" table, when published, are for the 24 hours ending at time of observation.

EVAPORATION is measured in the standard Weather Bureau type pan of 4-foot diameter unless otherwise shown by footnote following the "Evaporation and Wind" table. Max and Min in "Evaporation and Wind" table refer to extremes of temperature of water in pan as recorded during 24 hours ending at time of observation.

WATER EQUIVALENT values published in the "Snowfall and Snow on Ground" table are the water equivalent of snow, sleet, or ice on the ground. Samples for obtaining measurements are taken from different points for successive observations consequently, occasional drifting and other causes of local variability in the snowpack may result in apparent inconsistencies in the record.

SNOWFALL Entries of snowfall in the "Climatological Data" table, the "Snowfall and Snow on Ground" table, and in the "Seasonal Snowfall" table, include snow and sleet. Entries of snow on ground include snow, sleet, and ice.

NORMALS for all stations are climatological standard normals based on the period 1931-1960.

DIVISIONS, as used in this publication, became effective with data for October 1956.

STATION NAMES Figures and letters following the station name, such as 12 SSW, indicate distance in miles and direction from the post office.

SEASONAL TABLES Monthly and seasonal snowfall and heating degree days for the 12 months ending with the preceding June data will be carried in the July issue of this bulletin.

DELAYED DATA AND CORRECTIONS will be carried only in the June and December issues of this bulletin.

INTERPOLATED VALUES for monthly precipitation totals may be found in the annual issue of this publication.

IN THE DATA TABLES THE SYMBOLS AND LETTERS WHEN USED INDICATE THE FOLLOWING:

- No record in the "Supplemental Data" table, "Daily Precipitation" table, "Evaporation and Wind" table, "Snowfall and Snow on Ground" table, and the Station Index.

  No record in the "Climatological Data" table and the "Daily Temperature" table is indicated by no entry.

- And also on an earlier date or dates.

→ Highest observed one minute windspeed. This station is not equipped with an instrument to measure fastest mile data.

• Amount included in following measurement, time distribution unknown.

Gage is equipped with a windshield.

B Adjusted to a full month.

D Water equivalent of snowfall, wholly or partly estimated, using a ratio of 1 inch water equivalent to every 10 inches of new snowfall.

M One or more days of record missing. If average value is entered, less than 10 days record is missing. See "Daily Temperature" table for detailed daily record. Degree day data, if carried for this station, have been adjusted to represent the value for a full month.

R **Amounts from recording gage. (These amounts are essentially accurate but may vary slightly from the amounts to be published later in Hourly Precipitation Data.)**

T Trace, an amount too small to measure.

. Includes data for previous month.

IN THE STATION INDEX THE SYMBOLS AND LETTERS WHEN USED INDICATE THE FOLLOWING:

W The entry in time of observation column in Station Index means after rain.

[illegible] Recording Rain Gage Station. Hourly precipitation values are processed for special purposes, and are published later in the "Hourly Precipitation Data" bulletin. If daily amounts are published in [illegible] Data sometimes may differ from a separate non-recording gage, except where indicated by reference 'R'. Such amounts may differ from amounts published from the recording gage in [illegible] Precipitation Data bulletin.

C "Soil Temperature" table.

[illegible] Snowfall and Snow on Ground Table. Omission of data in any month indicates no snowfall and/or snow on ground in that month.

[illegible] Supplemental Data Table.

[illegible] Time of observation symbol in Station Index means observation made near sunset.

[illegible] Time of observation symbol in Station Index means variable.

[illegible] Thermometers are generally exposed in a shelter located a few feet above sod-covered ground, however, this reference indicates that the thermometers are exposed in a shelter located on the roof of a [illegible].

[illegible] Stations, in this index, but for which data are not listed in the tables, were either missing or received too late to be included in this issue.

[illegible] For each month are described in the publications MONTHLY WEATHER REVIEW, MONTHLY CLIMATOLOGICAL DATA NATIONAL SUMMARY, and STORM DATA, all of [illegible] Superintendent of Documents, Government Printing Office, Washington, D. C. 20402.

[illegible] Changes in the records of stations, including relocations, exposure, etc., of substations through 1959 may be found in the publication "Substation History" for this State, price $1.00. Similar [illegible] Weather Bureau, and may be found in the latest annual issue of Local Climatological Data, price 15 cents. These publications may be obtained from the Superintendent of Documents at [illegible].

[illegible] Publications, monthly and annual, $2.50 per year. (Yearly subscription includes the Annual Summary.) Checks and money orders should be made payable to the Superintendent [illegible] reporting subscriptions should be sent to the Superintendent of Documents, Government Printing Office, Washington, D. C. 20402.
